Development of nonhydrostatic Double Fourier Series global spectral Model (DFSM) and Global 7km mesh Model Intercomparison Project for improving TYphoon forecast (TYMIP-G7)

Hiromasa Yoshimura (hyoshimu@mri-jma.go.jp)

Meteorological Research Institute, Forecast Research Department

We have improved DFSM by modifying double Fourier series basis functions. We introduce some results of the 7km typhoon prediction experiments in TYMIP-G7.
