(Received October 15, 1956)

This collective report is succeeding "Report of Rain-making in Japan, Vol. 1", published by the Committee for Rain-making in Japan in 1954. This report might not always cover all of the researches in rain-making field in Japan since 1954, but it comprises most of the fundamental researches and experimental results in the field in the various regions in Japan for the period from the previous report down to this day.

The contents of this collective report are as follows.

- 1) Outline of the Studies on Artificial Precipitation in Hokkaido District.
- 2) Artificial Rain-making in Tohoku District.
- 3) Artificial Rain-making in Kanto District.
- 4) A Brief Account of the Research Activities in the Field of Rain and Snow Making in the Chubu District during the Period from April 1954, to February 1956.
- 5) Artificial Rain-making in Kansai District.
- 6) Researches on Rain-making in Kyushu Area, 1954~1956.
