

Chapter 0 : Boundary conditions

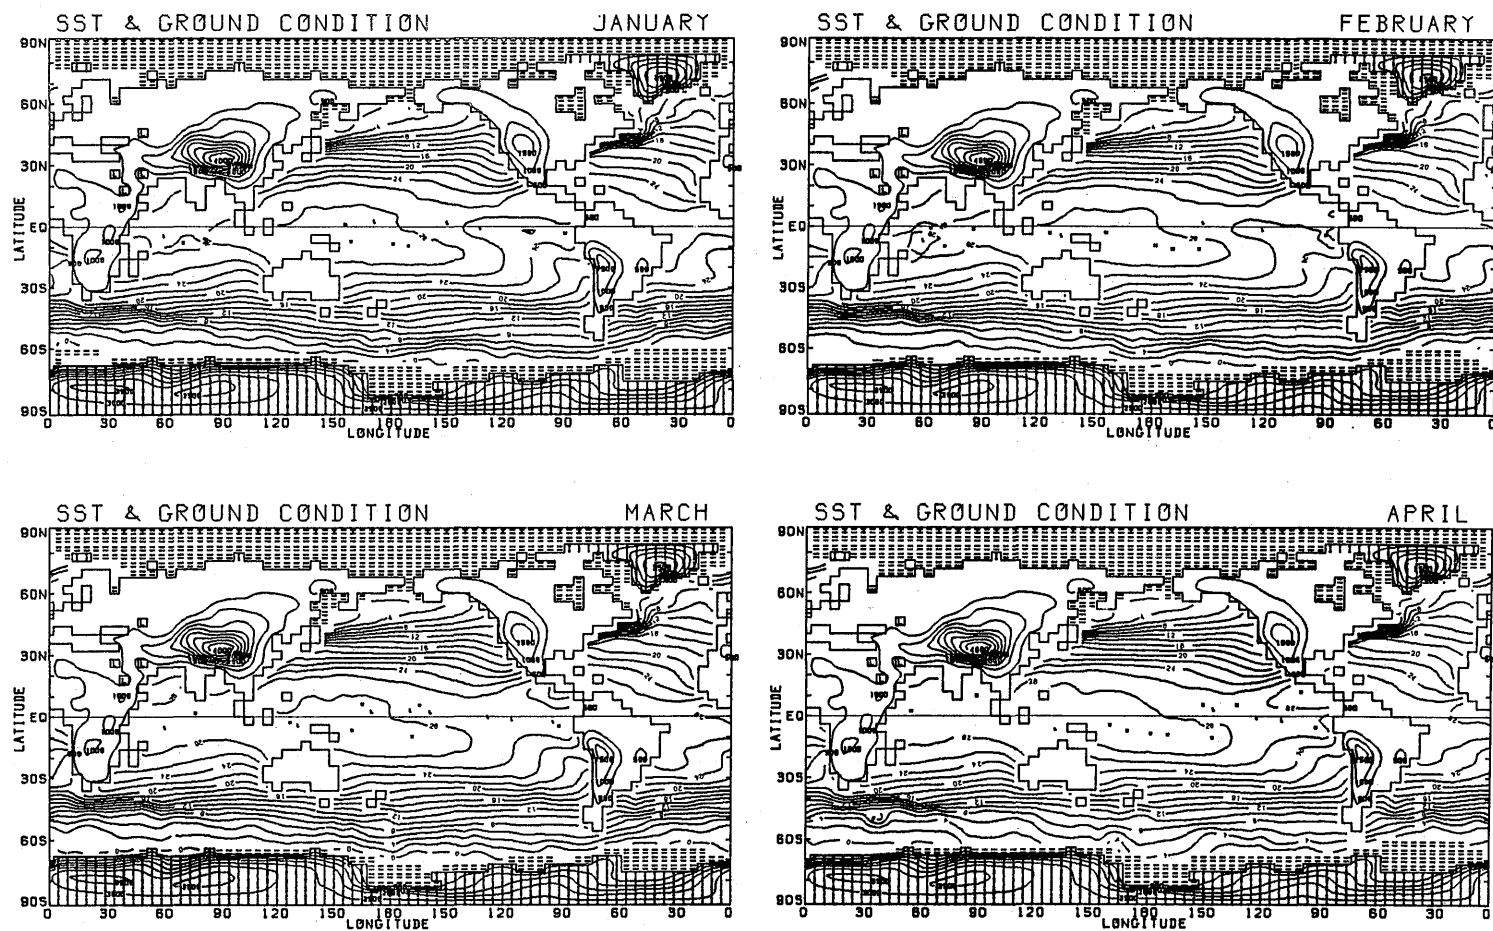

Fig. 0.1 . Topography used in the MRI-GCM-I. Contour interval is 500 m. The sea surface temperature distributions are shown over the ocean, together with land ice distributions indicated with "I", and sea ice distributions indicated with "=" for January, February, March and April. Contour interval for sea surface temperature is 2°C. The grid points indicated with "L" are lake points.

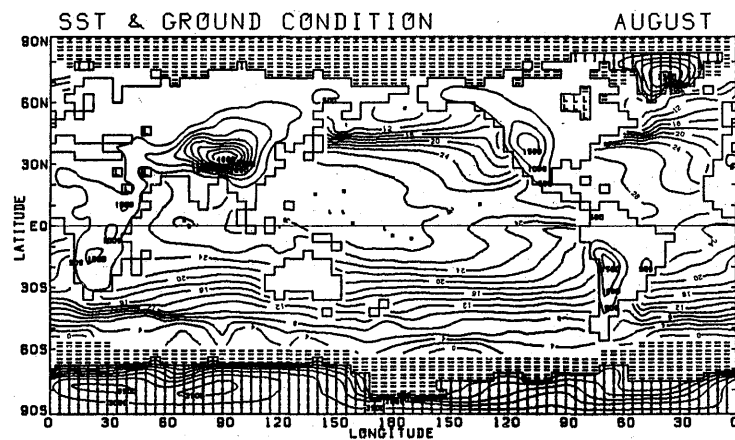

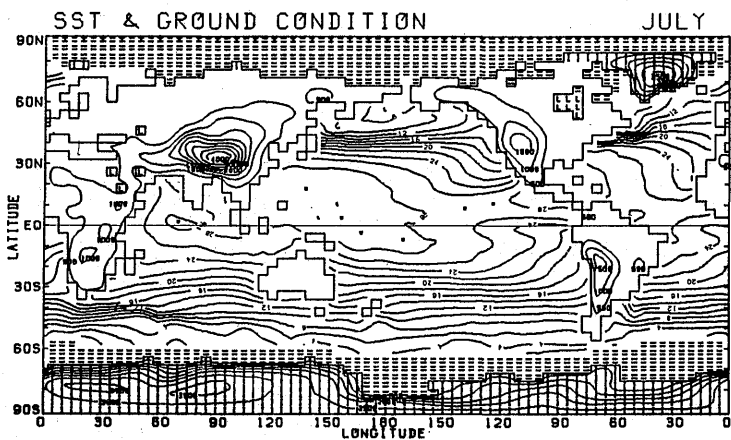

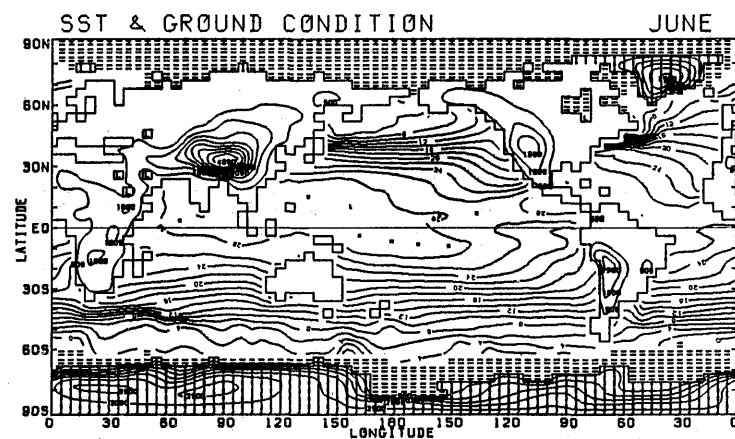

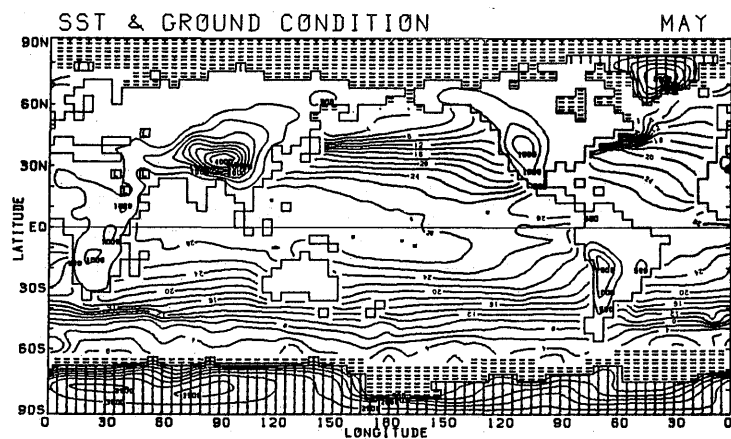

Fig. 0.2 Same as in Fig. 0.1 except for May, June, July and August.

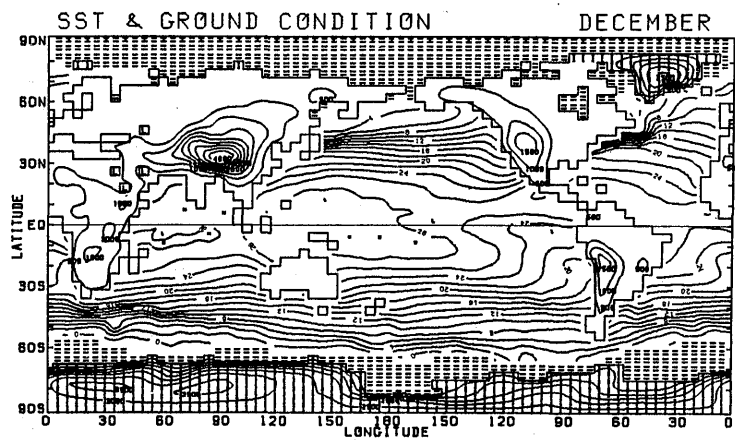

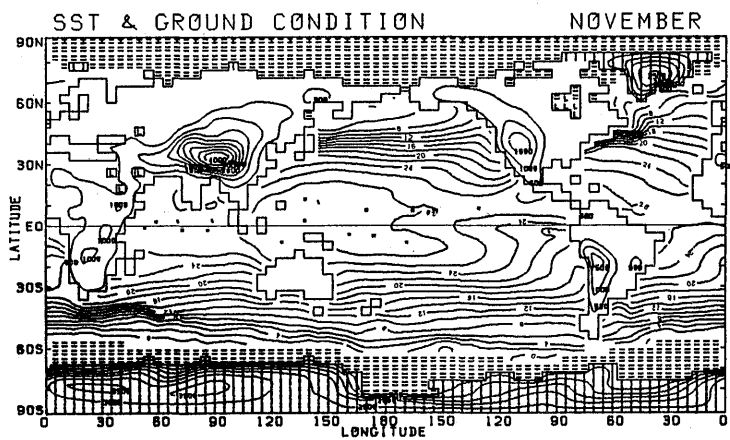

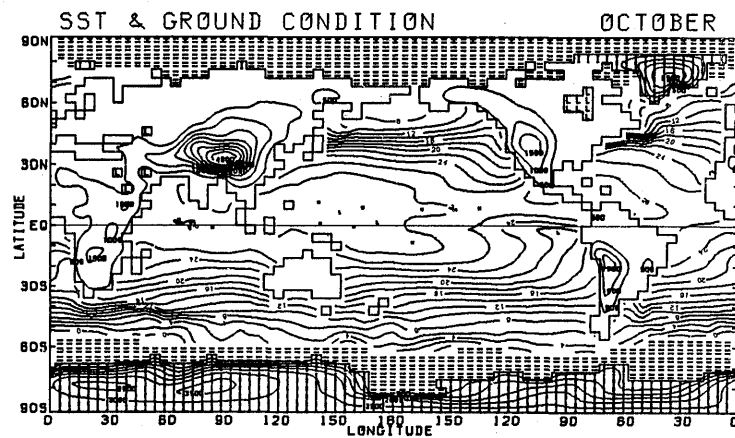

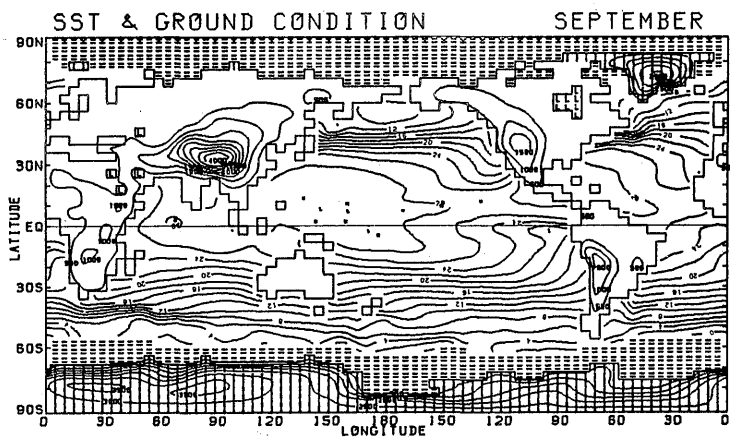

Fig. 0.3 Same as in Fig. 0.1 except for September, October, November and December.
