

# 5th International Workshop on Nonhydrostatic Models (NHM2018)

**14-16 November, 2018 Japan Meteorological Agency**

NHM2018 will focus on all aspects of nonhydrostatic models : from Large Eddy Simulation (LES) models to global models, dynamical frames, physics schemes, data assimilation schemes and regional climate models. Predictability and applications to mesoscale phenomena such as tropical cyclones, heavy precipitations, and shallow clouds are all welcome. The high-performance computing for the meteorological and climate researches in the future is one of our great concerns.

## Important dates

- \* **Registration deadline: 1 October, 2018**
- \* **Abstract deadline: 14 October, 2018**
- \* **Workshop: 14-16AM November, 2018**
- \* **Open seminar: 16PM November, 2018**

We are looking forward to seeing you in Tokyo.

## Organization

**Meteorological Society of Japan**

**Meteorological Research Institute(MRI)**

**Co-organization Japan Meteorological Agency(JMA)**

Logical Committee Member

Chair: Hiromu Seko (MRI JMA,

Japan Agency for Marine-earth Science and TEChnology)

Co-Chair: Akihiko Murata (MRI JMA)

Co-Chair: Akiyoshi Wada (MRI JMA)
