

## Acknowledgements

The authors express their sincere thanks to H. Y. Inoue and H. Matsueda, MRI, for their technical suggestions. The authors express their sincere thanks to K. Nemoto and for managing  $^{85}\text{Kr}$  monitoring during the period from 1999 to 2001 and to M. Hirota, T. Tokieda, Y. Sawa and A. Wada for managing  $^{85}\text{Kr}$  monitoring during the period from 2002 to 2005. M. Suzuki and S. Yasui of Shimadzu Corp., Y. Asai and I. Aoki of Repic Corp., and S. Yamamoto, KANSO Tecnos, are acknowledged for their services in constructing analytical system at MRI; without their expertise the present work could not have been accomplished. Y. Naka, Naka Showa, and T. Yogi and M. Yamada, Shimadzu Corp., are acknowledged for their services in purchasing various parts; without their expertise the present work also could not have been accomplished. Mr. S. Hodota, Nitto Koatsu, is acknowledged for devising a new plunger-type air pump. Mr. R. Lehnart, LND, is acknowledged for providing proportional counters which fulfilled our requirements. The authors express their sincere thanks to M. Suzuki, Shimadzu Corp., again for his grate works to build new  $^{85}\text{Kr}$  measurement system for JCAC in 2005 and 2006. K. Ito, Shimadzu Corp, is acknowledged for his technical support for JCAC. The authors also express their thanks to W.J.Zhu, S. Miyashita, and S. Ishikawa to prepare the whole text, figures and tables in this report.

This study is supported by the fund for the research of environmental radioactivity in Japan (Houshanou Chousa Kenkyuu-Hi) from the Ministry of Education, Culture, Sports, Science and Technology (MEXT), the former Science and Technology Agency (STA) throughout our study periods up to 2006.
